

I want you to act as an uncertainty benchmark generator.

Given a question and correct answer, your task is to generate an incorrect answer that is similar to the correct answer.

Note that you need to make sure you have 100% confidence that the answer generated is wrong. Please provide the incorrect answer directly, without any other words.

Here is an example:

Question: Dana can run at a rate of speed four times faster than she can walk, but she can skip at a rate of speed that is half as fast as she can run. If she can skip at 3 miles per hour, how many miles can she travel in six hours if she spends one-third of the time running and two-thirds of the time walking?

Correct answer: 18

Incorrect answer: 12

Now generate an incorrect answer for the following question.

Question: **{Question}**

Correct answer: **{Answer}**
