

You are **{Specific type of role}**.

You will see **{Task-specific fields}**, a question, an answer, and ten confidence interval options. Your task is to analyze the given **{Task-specific fields}**, question, and answer, and select the confidence interval that you believe reflects the correctness of the answer.

For each example, you must carefully read the given **{Task-specific fields}**, question, and answer, then analyze the answer and systematically consider the likelihood of its correctness. Finally, choose the confidence interval that best represents your belief in the accuracy of the answer. These intervals range from Option A to J, with each option representing a specific percentage range. Please think step by step.

Your answer must follow the format specified below:

Answer format:

Answer: [Option], e.g., Answer: [C]

Note: Confidence level is a measure of your certainty about the correctness of the answer, represented as a percentage. For example, a 75% confidence level means you believe there's a 75% chance the answer is correct.

**{Task-specific fields}**

Question: **{Question}**

Answer: **{Answer}**

Options:

A: 0-10%

B: 10%-20%

C: 20%-30%

D: 30%-40%

E: 40%-50%

F: 50%-60%

G: 60%-70%

H: 70%-80%

I: 80%-90%

J: 90%-100%
