

## How to cook spaghetti?

1. Boil water.
2. Add spaghetti.
3. Cook for 10 minutes.
4. Drain and add sauce.

## *Linear How-To Questions*

How to diagnose and fix a performance issue in a web application?

1. Check the server load and response time.

If the server load is high, then optimize server configuration or scale up resources.

If the response time is slow due to database queries, then optimize database indexes and queries.

...
