

1. Semantic Pattern

Train (Incident)

The following text describes an undirected graph. Determine if there is a path between two nodes in the graph.

Node 0 is connected to 1, ...

Q: Is there a path between node 4 and node 3?

Test (Friendship)

G describes a friendship graph among the following people. We have the following edges in G:

Evan and Willow are friends...

Q: Is there a path between node Christian and node Thomas?

2. Numerical Pattern

Train (Flow in int)

In a directed graph, the nodes are numbered from 0 to 6, and the edges are:

Node 1 is connected to node 3 with capacity 2.

Node 5 is connected to node 1 with capacity 8...

Q: What is the maximum flow from node 6 to node 3?

Test (Flow in float)

In a directed graph, the nodes are numbered from 0 to 6, and the edges are:

Node 1 is connected to node 3 with capacity 4.0.

Node 5 is connected to node 1 with capacity 6.2...

Q: What is the maximum flow from node 6 to node 3?

3. Structural Pattern

low transitivity:

high transitivity:

Train (low transitivity)

The following text describes a directed graph among 0, 1, 2, 3, 4, 5.

Node 1 should be visited before nodes 3, 4...

Q: Can all the nodes be visited? Give the solution.

Test (high transitivity)

The following text describes a directed graph among 0, 1, 2, 3, 4.

Node 1 should be visited before nodes 0...

Q: Can all the nodes be visited? Give the solution.

4. Reasoning Pattern

Train on Connectivity

The following text describes an undirected graph. Determine if there is a path between two nodes in the graph.

Node 0 is connected to 1, 2...

Q: Is there a path between node 4 and node 3?

Test on Shortest Path

The following paragraph describes an undirected graph with weights.

Node 0 is connected to node 4 with weight 1, node 5 with weight 10...

Q: What is the shortest path between node 1 and node 0, and what is the length of the shortest path?

5. Realistic Pattern

Train on connectivity & shortest path

The following text describes an undirected graph. Determine if there is a path between two nodes in the graph.

Node 0 is connected to 1, 2...

Q: Is there a path between node 4 and node 3?

The following paragraph describes an undirected graph with weights.

Node 0 is connected to node 4 with weight 1, node 5 with weight 10...

Q: What is the shortest path between node 1 and node 0, and what is the length of the shortest path?

Test on realistic task

Please answer the following question with either yes or no: Has a neanderthal ever served on the Supreme Court of the United States?
