

‘<Instruction>, you need to answer this question in three steps: First, provide an answer based on the question and offer analysis and suggestions according to the medical records. Does it involve the tumor marker AFP? Does it involve the tumor marker PIVKA? Does it include medication information? What can be analyzed from the medical records? Second, what is the significance of the tumor diameter in the provided information? What does the regularity of the tumor edge shape indicate? What does the grayscale difference inside the tumor signify? What does the grayscale difference between the tumor and surrounding tissue indicate? What does the distance between the tumor and the main blood vessels represent? Third, based on the medical records and imaging features, what is the best treatment option for the patient? Provide some medication suggestions. What should be noted during medication, chemotherapy, radiotherapy, or surgery? </Instruction>\n
