

A new pipeline feature

$X$

input

Point estimator

output

$$\hat{Y} \approx E(Y|X)$$

input

Diffusion model

output

$$\tilde{Y}(0) \sim Y|X$$

```
graph LR; X["A new pipeline feature X"] -- input --> PE["Point estimator"]; X -- input --> DM["Diffusion model"]; PE -- output --> Y_hat["Y-hat approx E(Y|X)"]; DM -- output --> Y_tilde["Y-tilde(0) ~ Y|X"];
```
