

{Instruction, Output} pairs

GPT-2-large

*supervised fine-tuning*

$\mathcal{M}_{SFT}$

STEP 1

Instruction

$\mathcal{M}_{SFT}$

Generated code A

Generated code B

Same prompts are used for code B

**Prompt**

Given an input task and a Python code, determine if the code imports all the necessary classes/modules for execution.

Task: Instruction

Code: code A

multiple prompts

Accumulate GPT-3.5 responses over all the prompts to score and rank the generated codes

code A < code B

training data

$\mathcal{M}_{SFT}$

*training with classifier head*

$\mathcal{M}_{Reward}$

STEP 2

Instruction

$\mathcal{M}_{SFT}$

*instruction*

Generated code

$\mathcal{M}_{Reward}$

reward

*RL using PPO*

$\mathcal{M}_{RL}$

STEP 3
