

SAT Solver

1?1?0?1100010111

$\check{p} = 0000001100010111$

Resume solving

Learn a blocking clause encoding that \check{p} is incorrect

Recover the high bits of p (thereby also revealing $q = N/p$) and terminate the solver

Coppersmith

Lattice formation

Lattice reduction

Get polynomial from the first row of the reduced lattice

Find integer root(s)
