

A sequence of five images showing a robotic arm moving a red block towards a green circle on a table. The images are arranged horizontally. In the first image, the red block is on the left, and the green circle is on the right. In the second image, the red block has moved closer to the green circle. In the third image, the red block is even closer. In the fourth image, the red block is almost touching the green circle. In the fifth image, the red block is in contact with the green circle.

Figure 1 displays a sequence of 12 images arranged in two rows of six, illustrating a robotic arm's movement. The arm, equipped with a red square and a green circle, is positioned against a textured background. The top row shows the green circle moving from left to right, while the bottom row shows it moving from right to left. The red square remains stationary in the center of the frame.
